### Model Bin0825 Part No 4499125

<u>Magnification</u>	<u>Objective Lens Dia</u>	<u>Prism Type</u>	<u>Weight</u>	<u>Length</u>	<u>Field Of View (Width)</u>
8X	25mm	Porro Prism	0.2Kg	105mm	117m@1000m

NOTE On both models, the eyecups can be rolled down for users wearing glasses.

### TAKING CARE OF YOUR BINOCULARS

- Remove any dust from the lenses with a blower and/or a soft lens brush which can be purchased from any camera shop. The lenses can be cleaned using approved lens cleaning solution and a soft lens cloth.
- The body can be wiped over with a soft damp cloth, **DO NOT** use any chemicals or abrasive cleaners.
- When the binoculars are not to be used for long periods, store them in a well ventilated location, avoiding high temperatures and humidity.
- Avoid strong impacts caused by bumping or dropping the binoculars.
- **DO NOT** apply excessive force when using the binoculars.

Please note that the details and specifications contained herein are correct at the time of going to print. However CLARKE International reserve the right to change specifications at any time without prior notice.

## Attaching Support Strap

Before using your binoculars for the first time, ensure the neck strap/wriststrap is fitted securely.

### TYPE 'A' (two loops)

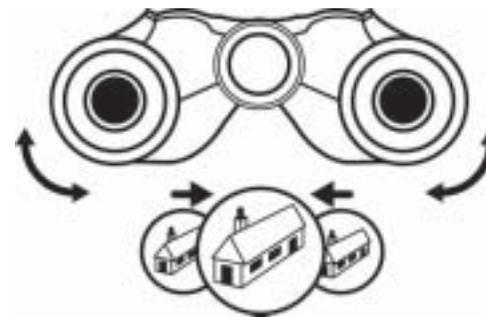

### TYPE 'B' (one loop)

## Instructions For Use

### Adjusting the eye interval

Hold the binoculars in the normal viewing position and move the unit slowly as shown in the figure below until the field of view becomes a single circle.

## Adjusting the focus wheel

While looking through the left eyepiece (with your left eye), rotate the focus wheel in both directions, until the subject is in focus

### Adjusting the right eyepiece

While looking through the right eyepiece (with your right eye), rotate the right lens until the same subject is in focus.

Again note the reading on the diopter scale for future use.

Finally, using both eyes, rotate the focus wheel until the subject is in optimum focus.
