

CLARKE

100w RECHARGEABLE SPOTLIGHT

Model No: CSR100

Part No: 5469005

- ◆ Portable halogen spotlight, provides an intense beam of two million candle power.
- ◆ Ideal for use by the roadside, as a searchlight and outside activities such as caravanning, camping, boating, walking, hunting, fishing etc.
- ◆ Can be recharged from the mains or car.

Features:

- ◆ Switch from one million to two million candle power at the touch of a button.
- ◆ Map reading light in the base of the handle.
- ◆ Streamline ABS housing with nonslip rubber grip handle.
- ◆ Water resistant.
- ◆ LED battery power indicator.
- ◆ 230 volts ac mains charger.
- ◆ 12 volts dc cigarette lighter plug charger.

A fully charged battery will provide approximately 30 minutes continuous use.

CAUTION

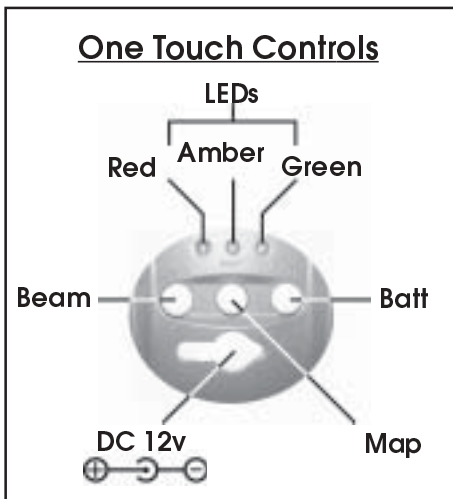

NEVER shine the light directly into anyones eyes, including animals.

NEVER touch the lens cover. The quartz halogen light bulb generates extreme heat.

ALWAYS use the charging adapters supplied with the lamp, **ONLY**.

If you plan to store the spotlight (e.g. for emergencies), we recommend that the battery is fully charged before doing so, this will ensure the longest possible battery life.

To prolong the life of the battery and to help prevent premature failure, we recommend that the battery is charged every four months.

CHARGING

ONLY use the charging adapters supplied with the lamp.

AC Charger

- Ensure the lamp is switched OFF.
- Insert the small plug of mains adapter into the DC 12v socket on the back of the lamp.
- Plug the adapter into a suitable 230vac socket and switch on.
- The red LED should illuminate after a couple of seconds, if the red LED does not illuminate, operate the lamp ON/OFF switch once only, the LED should now light up. Battery is now charging.

DO NOT CHARGE FOR MORE THAN 48 HOURS OTHERWISE DAMAGE TO THE CHARGER AND OR THE LAMP MAY OCCUR.

12v DC CHARGING CORD

Ensure the lamp is turned OFF, failure to do so will result in the fuse link in the plug to blow. Replacement fuses are available from your nearest Clarke dealer.

Insert the small plug of the 12 volt DC charging cord into the DC 12v socket on the back of the lamp.

Plug the other end into the cigarette lighter socket. The red LED should illuminate after a couple of seconds, if the red LED does not light up, disconnect the 12 volt Dc charging cord, check and replace the **3amp** fuse in the large plug of the 12 volt DC charging cord. Operate the lamp ON/Off switch once only, reconnect the charging cord, the red LED should now illuminate.

NOTE: A fully discharged battery takes approximately 6 hours from AC power and 2.5 hours from DC power.

TESTING BATTERY POWER

To check the amount of energy in the battery, ensure the lamp is switched OFF, then simply press and hold the **Batt** button,

- RESULTS**
- Red, Amber & Green LEDs illuminated= Full charge**
 - Red & Amber LEDs illuminated= Partial charge**
 - Red Led illuminated.....= Flat battery requiring recharging**

MAP READING

Ensure the main spot lamp is off, press the map button, the map reading light will illuminate.

CLEANING

Never use harmful chemicals or abrasives, wipe over with a damp cloth only.

Alcohol or glass cleaner may be used to clean the lens.

BATTERY DISPOSAL

Always dispose of rechargeable batteries according to local authority regulations.
